

February 16, 2012

Dear LTISD Parents and Guardians:

As you may already know, the City of Lakeway held a public meeting last night to receive citizen input regarding a proposed drug and alcohol treatment center near Lakeway Elementary School. District officials attended the meeting with the sole purpose of obtaining information about the project we had not yet received.

Parents and residents expressed a number of concerns mostly which were focused on protecting the children and the elderly in Lakeway. Rest assured, those concerns resonate loud and clear. While we respect the intent of the proposed project, we ultimately support the expectations of our parents and residents to maintain a safe environment for our students and school community.

Furthermore, after learning more about the proposed project last night, we have the utmost confidence that the City of Lakeway and the parties involved in this proposed project will soon arrive at a resolution.

While we are not directly involved in the proposed project, please know we will do everything possible to support our school community and protect our students.

Sincerely,

Brad Lancaster, Ed.D.  
Superintendent of Schools
